M.2 Status of Cultural Resources Management Plan

M.2.1 Summary Introduction

The U.S. Army Corps of Engineers Charleston District (USACE) is the lead federal agency for preparation of the EIS for the Haile Gold Mine Project. Haile Gold Mine, Inc. (Applicant), a subsidiary of Romarco Minerals, Inc. has applied for a Department of the Army (DA) permit from the USACE to allow discharge of dredged or fill material into waters of the United States pursuant to Section 404 of the Clean Water Act (CWA) during the mining process. The Project involves a federal action because the fill activities associated with gold mining in wetlands and other waters of the United States (Waters of the U.S.) require authorization through a DA permit under Section 404 of the CWA (33 U.S. Code [USC] 1344). Under Section 404, the USACE was delegated authority to issue permits for discharges of dredged or fill material into Waters of the U.S. The USACE serves as the lead agency and has set forth implementing regulations in Title 33 Code of Federal Regulations (CFR) Parts 320–332. The USACE has the responsibility for complying with 33 CFR Part 325 (Procedures for the Protection of Historic Properties), with advisory assistance from the South Carolina State Historic Preservation Office in meeting its obligations under Section 106 of the National Historic Preservation Act.

The USACE recommended preparation of a Cultural Resources Management Plan (CRMP) for the Project to ensure preservation or other appropriate treatment of historic properties within the Cultural Resources Study Area. The CRMP will include the following:

- procedures to minimize damage to historic properties;
- procedures for the ongoing identification and evaluation of historic properties;
- timelines for completing tasks, including identification, evaluation, and reporting; and
- provisions for ready access to pertinent information, including standards, guidelines, and points of contact.

The Applicant prepared a draft CRMP that was submitted to the USACE for review and comment. The Applicant prepared a revised CRMP based on the USACE's comments. The revised CRMP is not yet complete and it is still under review by the USACE. The CRMP will be completed between the DEIS and the FEIS.
